NRO REVIEW COMPLETED

Copy no. 9

27 JAN 1965

**MEMORANDUM FOR: Special Assistant to the Deputy
Director for Science and Technology**

SUBJECT: NPIC SAN Search of Communist China

25X1

1. In accordance with your instructions, we have met with OSA to discuss the need and details related to a further continuation of the high priority NPIC search for surface-to-air missile sites in Communist China.

2. OSA expressed the need, and we concur, that the level of effort at NPIC which is currently applied to the problem, be continued for a week to ten days past 1 February.

25X1

3. The emphasis for the second phase of the effort will be primarily along the coastal belt with specific interior targets included in the manner described in the attached requirement which is being forwarded to CGS.

4. We expect to obtain an estimate from NPIC today of the work they will have accomplished on the original requirement by 1 February and this will be brought to your attention as soon as possible.

5. Since the extension of the original effort at NPIC will result in the continued delay of ORR requirements, as well as our own, I believe that ORR will protest and that a representative of the DD/I will probably contact you on the matter.

SIGNED

**DONALD F. CHAMBERLAIN
Assistant Director
Scientific Intelligence**
